MESH BELT**

# REPLACEMENT OF OVEN SLAT BELT WITH STEEL MESH BELT

The upgrade consists in the replacement of the oven slat belt with steel mesh belt. This replacement gives several benefits, among them:

Improving the heat-shrinking thanks to better ventilation of the heating chamber, lowering by almost 10° C the temperature, which means power saving

A component that is not exclusively patented of the manufacturer for an easier and cheaper procurement

We supply used, overhauled, and guaranteed machinery to provide the same performances as last generation's

## OPTIONAL – TEFLON COATING SYSTEM

System to spray a Teflon oil over the steel mesh to create a coat that prevents the film from sticking on any type of oven belt. It is advisable for the tray format especially
